

# HEDGE HOGS - 3', 5', 7'

The Hedge Hog is used for anti-terrorism and force protection in a variety of applications and configurations. Three pieces of 3 foot long x 3/8" manufactured U.S. Steel complete the unit. The product is banded together and shipped as a single unit. Using the supplied hardware, the Hedgehog can be bolted together on site to create a barrier that is easily installed without engineering support. The unit can be disassembled for repositioning.

The product is painted with a primer coat in a dark color. If command requests any other color, it must be specified when ordering. . Other sizes can be quoted, simply call us for your individual requirements. This product can be used in combination with other size Hedge Hogs to create a formidable barrier that extends from the road surface to the high marsh on uneven terrain.

A Chain Kit option is available.
