

# Rapid Deploy Razor Wire

## With Concertina Razor Wire

## PRODUCT FEATURES

- Concertina Razor Wire is shipped on magazine.
- The magazine is used to deploy / recover the Concertina Razor Wire.
- Optional trailer is available to deploy / recover Concertina Razor Wire as shown in above photo.
- Approximately 500 ft of Triple strand Concertina Razor Wire.
- Using the trailer, the 500 ft of Concertina Razor Wire can be deployed in about 2 minutes. Then it can be staked in place with included ground stakes.
- Using the trailer, the 500 ft of Concertina Razor Wire can be recovered in about 20 minutes.
- Razor wire can be produced with NATO short barb, medium barb, long barb or detainer barb.
- Available with galvanized/galvanized, galvanized/stainless or stainless/stainless wire
- 2 Recovery Hooks are included to assist operators in wire recovery.
- Deployment arm tilts out for deployment and recovery of wire. When lowered, it locks the wire into the magazine.
- If optional trailer is purchased, a Tool Box will be attached to trailer that will include lock includes; Safety gloves, Safety glasses, Stakes, Sledge, Wire Ties, Hog Rings and Hog Ring Pliers.
- The magazine with Concertina Razor Wire and optional trailer will fit into shipping containers.
