

# HIGH THREAT BARRICADES

The **High Threat Barricade** is easily moved by hand, without engineering support, to provide excellent protection in any application. Easily connects to the Houston Barricade. Simply position the barricade and fill with water or sand for ballast, as determined by the threat level. Simply, empty the barricade and recover for repositioning or storage for later use.

The barricade is made of rotationally molded plastic and is therefore maintenance free, with no need of paint and no metal to rust. Standard colors for High Threat Barricade are white concrete, safety orange, safety yellow, olive drab and desert tan. Other colors are available upon request.

Patented, tested and deployed makes this the premium item for anti terrorism and force protection. CBP has conducted live fire tests with 50 cal. & 155 fragmentation shrapnel and these tests were conducted by independent labs. HP White (Report on request). Demonstrated at Aberdeen Proving Grounds with an RPG7-HE in both water and sand filled. This barricade, as well as all the other high

Part Number:	Description:	Size:	Weight:
