

HIGH THREAT BARRICADES

The **High Threat Barricade** is easily moved by hand, without engineering support, to provide excellent protection in any application. It easily can connect to the Houston Barricade. Simply position the barricade and fill with water or sand for ballast, as determined by threat level. Simply, empty the barricade and recover for repositioning or storage for later use.

The barricade is made of rotationally molded plastic and is therefore maintenance free, with no need of paint and no metal to rust. Standard colors for the High Threat Barricade are white concrete, safety orange, safety yellow, olive drab and desert tan. Other colors are available upon request.

Patented, tested and deployed makes this the premium item for anti terrorism and force protection. PSP has conducted live fire tests with 50 cal. & 155 fragmentation shrapnel. These tests were conducted by independent labs, HP White (report available upon request). Demonstrated at Aberdeen Proving Grounds with RPG7-HE in both water and sand filled configurations. This barricade and the other high density polyethylene products from PSP, are well known for catching shrapnel and eliminating rebound and ricochet.

Part Number:	Description:	Size:	Weight:
6036W	5 Ft. High Threat Barricade / Water	60" H x 36" W x 89" L	300 lbs.
6036S	5 Ft. High Threat Barricade / Sand	60" H x 36" W x 89" L	320 lbs.
4836W	4 Ft. High Threat Barricade / Water	48" H x 36" W x 89" L	250 lbs.
4836S	4 Ft. High Threat Barricade / Sand	48" H x 36" W x 89" L	270 lbs.
