

BALLISTIC BENCH

The NIJ-4 Ballistic Bench was designed for providing protection across the front of a Military Recruiting Office.

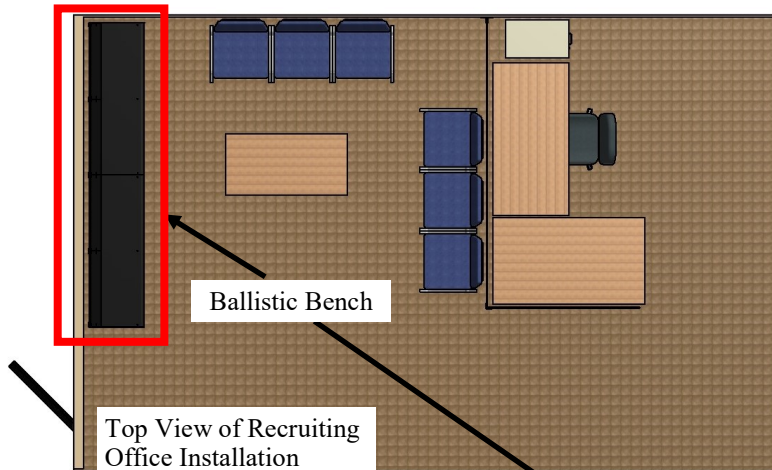

The benches are easy to assemble and requires no engineering support. The benches are 5 feet long and can be either free standing or anchored to floor. If you require a bench longer than 5 feet, then you can connect them together to make longer benches.

All parts and hardware required for assembly are included.

Ballistic Bench uses:

- Recruiting Offices
- Government Offices
- Military Bases / Operations
- Schools
- Police Stations
- Court Houses
- High Value Personnel
- Banks
- Hospitals

NIJ-4 Ballistic protection and will stop the following rounds:

- 30-06 AP (Armor piercing) Round
- 7.62 x 54 ball Round
- AK47 (7.62 x 39) Round
- 45 Cal Handgun Round
- Most Blast Fragments
