

CENTURION CSW GUARD TOWER

The Centurion CSW is a mission configurable system with ballistic protection, (NIJ LVL 4) that can be set in place and deployed in under 5 minutes. The Centurion’s ability to be rapidly deployed makes it ideal for Military Checkpoints, Dock Security, Border Patrol Operations and many other mobile security needs.

The walls, windows and roof of the Centurion CSW Guard Tower are NIJ LVL 4 certified. They provide 360° protection from 30.06 armor piercing rounds. The Centurion CSW is equipped with top windows that swing open outwards and bottom windows that slide down out of view. It has a folding weapon support shelves that can be flipped out to support the bipod of a weapon.

An option Accessory Mount is available. The Accessory Mount can be attached to the roof of the guard tower or top platform of the lift.

The floor is made from 3/16” thick ballistic steel to provide shrapnel protection. The floor is vinyl coated to improve traction and wear.

The Centurion ships completely assembled and ready to use upon arrival. Each unit comes complete with a lightning arrestor kit.

- **Fast and Simple Setup**
- **Facilitates Rapid Repositioning of Assets**
- **360° Ballistic Protection (NIJ LVL 4 Ballistic Panels)**
- **Easily Transportable**
- **24 Volt DC Battery Operated Hydraulic Lift System**

Centurion CSW shown with optional Centurion Trailer.

CENTURION CSW GUARD TOWER

The Centurion CSW has a battery operated hydraulic system for raising and lowering the tower. The 24 volt DC battery operated hydraulic pump makes setup as easy as pressing a button. The system is kept charged by a solar panel.

The Centurion CSW is accessed by climbing up the steel ladder and entering through the door opening. When the unit is in the up position, the door is closed to provide 360° ballistic protection (NIJ LVL 4).

The Centurion CSW base conforms to standard shipping container specifications. It can be transported overseas via ship as a standard Conex box, shipped inside a 40' high cube shipping container or via air on a standard 463L pallet.

The Centurion CSW can be deployed or recovered without mechanical assistance by towing it with a pickup or military vehicle. When on site it can be deployed and stabilized on the trailer by extending the trailer outriggers.

When the unit is deployed on the trailer, the guards eyes will be at about 18' above the ground.

The Centurion CSW is shown deployed with optional accessory mount on roof.

The Centurion CSW can be transported by the Centurion Trailer (shown above).
