

HEDGE HOGS - 3', 5' & 7'

The Hedge Hog is used for anti-terrorism and force protection in a variety of applications and configurations. All three sizes, (3, 5 and 7 foot) are made from 3/8" thick U.S. manufactured Steel. Each unit comes with hardware to make assembly easy on site to create a barrier that can be installed without engineering support. The unit can be disassembled for repositioning. The 3 sections of each Barricade are banded together and shipped as a single unit to save space.

Units are painted in primer coat. Custom colors are available on request at an additional cost. Color must be specified when ordering. Custom sizes are available, simply call us for your individual requirements. With the use of the optional Chain Kit, Individual Hedge Hogs can be connected together to create a formidable barrier across a road surface or on uneven terrain.

Part No.:	Description:	Size:	Color:	Weight:
