

STACKED PLATE BARRICADE

The **Stacked Plate Barrier** is a security response anti-terrorism barrier that is designed to be rapidly deployed. It is ideal for all levels of security such as government buildings, airports, military units, guard units, border patrol, government buildings and embassies. It will also provide excellent security for fire departments, police departments, serpentine approaches, crowd control, security lanes and vehicle control. Due to the open design the barrier is see through and cannot be used as a defensive hiding position.

The **Stacked Plate Barrier** can be used in a variety of applications including: traffic control and channeling, building security, gate approach, bridges, roads, work zones, construction areas, lane delineation, national and state parks, and parking lots.

The large wheels and handles allow it to be positioned by a single person. The unit is shipped disassembled for space savings and assembled on site. No tools are required for assembly and it does not require any water or sand.
