

TIRE SHREDDER

The Tire Shredder / One Way Directional Traffic Controller can be easily installed on an existing roadway without any excavating or asphalt cutting required. The 2" low profile allows for smooth passage over the base. The teeth are spring loaded and will retract as the vehicle drives over it.

The Tire Shredder is constructed of 1/4" thick hot rolled steel for long lasting durability, the all welded construction is fabricated in 3' sections.

Part No.	Color:	Size:	Weight:
DC36-LD	Safety Red	2" H x 22" W x 36" L	125 lbs.

The teeth can be locked down in place to allow traffic in both directions.
