

DROP ARM GATE

The Manual Drop Arm Gate is available in 8', 12', 13' and 16' opening widths. Custom sizes available upon request. The Drop Arm Gate is equipped with a lock pin that can lock the gate in either the open or closed position. The pin can also be padlocked in place.

The beam is manufactured using aluminum tubing (8', 12' and 16' models) and then painted alternating Black & Safety Yellow for high visibility. The 13' model uses a one piece steel tubing beam for the arm that is painted black.

Frames are not anchored to the ground. They can be held in place ballasts blocks. You can supply your own or we have Urban Terrorism Barricades that can be filled with sand or concrete.
