

# HEAVY DUTY STANCHION

The Heavy Duty Stanchion is rotationally molded with High Density Polyethylene and can be easily filled with water or sand for ballast. The 1/4" nominal thickness plus the weight of the ballast allows the unit to remain upright in high winds or jet blasts.

The stanchions are great for directing traffic or roping off flight lines, sports events, parking lots, air shows, restricted areas and crosswalks. Just let your imagination take over!

Each post has a 3/8"-16 threaded insert in the top which allows you to attach the included eye bolt or other hardware. Ropes, chains, signs, plastic tape or many other items can be attached to the Stanchions.

Part Number:	Color:	Weight (Empty)	Weight (with Water)	Weight (with Sand)	NSN Number:
61111	Safety Orange	20 Pounds	65 Pounds	120 Pounds	5660-01-468-0198
61112	Safety Yellow	20 Pounds	65 Pounds	120 Pounds	5660-01-468-0202
61113	Red	20 Pounds	65 Pounds	120 Pounds	5660-01-468-0203
61114	Concrete	20 Pounds	65 Pounds	120 Pounds	5660-01-468-0206
