

HIGH THREAT HOUSTON BARRICADE

Houston Corner allows continuous connection at 90° angles.

The Houston Barricade is a decorative yet functional choice for protecting your valuable infrastructure.

The Houston Ultra High Threat Barricade is 8 feet tall x 7 feet long. The gray and tan granite colors make a great blend with other structures. While still providing the maximum blast protection using sand as a fill ballast for blast mitigation. Desert Tan and Olive Drab are also available if desired.

The product is ideal for Airports, Federal Applications and any place where there is blast mitigation concerns. No heavy equipment is necessary to install the barricade. A funnel is available that fits on top of the Houston Barricade and simplifies filling of the barricade using a small loader. Once the barricade is filled with sand, if needed, it can be repositioned with 12k fork lifts or other heavy material handling equipment.

The Houston Corner Barricade is made to fit into the end of the High Threat Houston Barricade. It allows the Houston Barricade to be positioned at 90° angles with no gaps or spaces in your security perimeter.

The Houston Barricade and Corner Barricade are rotationally molded utilizing high density polyethylene with a UV stabilizer. If the material becomes damaged it can be repaired by using any plastic repair kit. Our sand filled barriers are known for catching shrapnel and eliminating rebound and ricochet.
