

MISSION CONFIGURABLE CONTAINER TRAILER

The MCCS Trailer is the ideal mounting platform for the MCCS. The optional trailer adds 4' of additional height to the container. The outriggers provide superior stability to the MCCS for increased firing accuracy. The MCCS can be easily removed from the trailer when needed by unlocking the twist locks that secure the container to the trailer.

The tool box contains wheel chocks, tire iron, and 16" x 16" rigger plates for additional support on soft surfaces. The 24 VDC solar panel maintains the battery readiness of the MCCS container when in storage.
