Product Description:

The Fence Panel is used for fast application and temporary fencing projects. Easy two man installation with no special tools. The Fence eliminates digging holes in the ground or parking lot. The fence is never a lost asset when moving to a new location it is portable, reusable and can also be used on pavement or cement with no destruction. Each panel includes a 90 lb. concrete base pad (containing installation holes), with 6 feet high chain link fence, barbed wire stringer on top and 2 section clamps. Panels clamp together easily forming a fence system for any application. Right angles or any configuration can easily be made on level or uneven terrain. Each section is 10 feet long for easy installation affording quick set up and take down, with no engineering support. No gates are necessary--simply undo the 2 clamps and you have an instant 20 feet gate, at no added cost. This product can be used for ground control, air shows, gate channeling, urban terrorism, building security, temp restricted area, POW holding area, POL dump, VIP parking, plant access and many other uses.
