Force Protection Products Since 1979.

## FORESTRY GATE

The Forestry Gate allows you to give out the combination for one lock to people that you temporarily permit to use the gate. The combination is changeable. The second lock can be used to open the gate by authorized personnel using a key.

The Forestry Gate is designed to be tamper proof. It protects both locks from weapons, hammers, saws and other tools that might be used to force entry. This gate is ideal for protecting roads, trails, etc., that are remotely located. Preventing unauthorized vehicle travel.

- Double Lock for Keyed or Combination Entry
- Vandal Proof
- Easy to Operate and Maintain
- Custom Sizes and Colors Available

Gate shown protecting a remote road. Available in custom sizes.

Each gate is constructed of 4" heavy gauge square tubing. All hinges are reinforced and locked in place to prevent the removal of the gate from its hinges when closed. The gate post assemblies extend into the ground 4'ft for strength and added support.

# FORESTRY Gate

The tamper proof cover that houses the locks allows easy access to unlock the gate without allowing the combination lock to be removed. The double rail slide latch has grease fittings built-in, to make sliding open the gate latch easy today and for years to come.

Double rail slide latch shown in the open position.

The gate can be open with either the combination or the keyed lock.

The nylon bottom support is attached to the gate post assembly to guide the gate into position when closing.

Nylon bottom support on post

Sag adjustment built-in top rail

The Forestry Gate has a height adjuster built-in the top rail of the gate that makes it easy to adjust the gate for sag. This keeps the latch assembly perfectly aligned. Each gate comes complete with a keyed and combination heavy duty lock, instructions and all mounting hardware.

Part Number	Description	Color	Weight	Dimensions
FS4168	Forestry Gate - 14 ft.	Primer	2850 lbs	5-1/2' x 14'
